SUBJECT INDEX

1967, Volume 29

Aberration, alternating (Marriott). 941, *P.*
Acid-base balance in complete transposition of the great vessels (Shaher & Kidd). 207
Acidosis, and electrocardiogram in Asiatic cholera (Carpenter *et al.*). 103.
— metabolic, and cardiac arrhythmias in acute myocardial infarction (Anderson *et al.*). 939, *P.*
Adams, R., surgeon cardiologist of the 19th century (Evan Bedford). 464
Adams-Stokes attacks, pacemaker implantation in familial congenital A-V block complicated by: case report (Veracochea *et al.*). 810
Adrenaline, and noradrenaline, free, excretion in acute myocardial infarction (Valori). 628, *P.*
Ageing changes in human heart valves (Pomerance). 222
Alcohol, hæmodynamic effects in coronary heart disease (Conway & Sowton). 941, *P.*
Alcoholic heart disease, electron microscopic observations (Alexander). 200
Altitude, high, in Peru, histology, extensibility, and chemical composition of pulmonary trunk in persons living at sea-level and high altitude (Castillo *et al.*). 120
— — pulmonary blood volume, effect of two years' intermittent stay (Roy *et al.*). 428
Aneurysm, aortic, familial dissecting, report of three cases within two generations (Hanley & Jones). 852
— of the membranous ventricular septum (Jain & Rosenthal). 60
Angiocardiography, influence of beta-adrenergic blockade on immediate hæmodynamic effect of (Reale *et al.*). 761
— left ventricular, in atrio-ventricular defects (Somerville & Jefferson). 939, *P.*
Angiography, coronary, atrial pacing during selective (Benchimol & McNally). 767
Aorta, coarctation, diagnostic auscultatory complex in (Bousvaros). 443
— *see also* Arteries, great.
Apex cardiogram, prediction of left ventricular diastolic pressures in aortic stenosis from (Fleming & Hamer). 942, *P.*
Arch, aortic, right-sided, associated with pseudo-aplasia of the right pulmonary artery (Porstmann *et al.*). 527
Arrhythmias, cardiac, in acute myocardial infarction, and metabolic acidosis, relationship between (Anderson *et al.*). 939, *P.*
— — and congenital heart disease in one family (Amarasingham & Fleming). 78
— — critical analysis of 50 complications following the electroconversion of in 220 patients (Resnekov & McDonald). 632, *P.*
— — effects of dextro isomer (+) of propranolol on (Howitt *et al.*). 942, *P.*
— — electrical reversion (Lown). 469
— — following successful closure of atrial septal defect (Reid & Stevenson). 742
— — natural history and clinical significance after acute cardiac infarction (Fluck *et al.*). 170
Arteriography, coronary, selective, electrocardiographic response (Coskey & Magidson). 512
Artery(ies), coronary, intrinsic calibre, and myocardial infarction (Rose *et al.*). 548
— — right ventricular fistula, treated surgically: case report (Abrams *et al.*). 132
— — *see also* Coronary heart disease.
— great, transposition, anatomically corrected (Van Praagh, R. and Van Praagh, S.). 112
— mammary, internal, flowmeter studies after implantation into left ventricular myocardium (Provan). 631, *P.*
— pulmonary, banding, for common atrio-ventricular canal (Somerville *et al.*). 816
— — —, electrocardiogram in selection of patients (Higashino & Moss). 252
— — — for ventricular septal defect (Grainger *et al.*). 289
— — congenital "absence" and anomalous origin, and variations of the same congenital defect (Winship *et al.*). 34
— — determination of pressure in, by external graphic recordings (Burstin). 396
— — right, pseudo-aplasia, associated with right-sided aortic arch (Porstmann *et al.*). 527
— — supravalvar stenosis of (Schlesinger & Meester). 829
— — thrombosis, two cases (Rueben). 621
— — *see also* Arteries, great.
Ascorbate dilution technique, compared with blood oximetry in diagnosis of left-to-right shunts (Bentivoglio *et al.*). 212
Ascorbic acid, clinical use, indicator of right-to-left shunt (Levy *et al.*). 22
Atherosclerosis, lesions, incidence at Madras, India (Subramaniam & Kulangara). 333
Atrioventricular canal, *see* Canal.
—— defects, *see* Defects.

Ballistocardiogram and left ventricular ejection in the dog (Deuchar *et al.*). 631, *P.*
Ballistocardiography (Deuchar). 285
Banding, *see* Arteries.
Bellingham O'B., surgeon cardiologist of the 19th century (Evan Bedford). 467
Bigeminy, iatrogenic escape-capture (Castellanos *et al.*). 264
Block, A-V, familial congenital, pacemaker implantation complicated by Adams-Stokes attacks; case report (Veracochea *et al.*). 810
— bundle-branch, aetiology (Mulcahy & Hickey). 633, *P.*
— heart, chronic, cause of death in patients with artificial pacemakers (Harris *et al.*). 633, *P.*
— — complete, retrograde conduction in (Castillo & Samet). 553
— — congenital complete, in pregnancy (Kenmure & Cameron). 910
— — — — followed for 34–40 years, six cases (Campbell & Emanuel). 577
— left bundle-branch, intermittent complete, phonocardiography and mechanocardiography, one case (Baragan *et al.*). 520

Blockade, beta-adrenergic, in experimental myocardial infarction (Pentecost & Austen). 628, *P.*
— — — influence on immediate hæmodynamic effects of angiocardiography (Reale *et al.*). 761
Blood, oximetry, compared with ascorbate dilution technique in diagnosis of left-to-right shunts (Bentivoglio *et al.*). 212
— pressure, relation of plasma renin to, in patient with coarctation: case report (Pickens). 135
— supply, arterial, of the human sinus node (Verhaeghe & van der Hauwaert). 801
— volume, pulmonary, effect of two years' intermittent stay at high altitudes (Roy *et al.*). 428
Brain damage, and heart failure, newborn (Grey & Prosser). 30
Burns, Allan, surgeon cardiologist of the 19th century (Evan Bedford). 461

Calcification of the mitral valve, results of 100 valvotomies (Kitchin & Turner). 137
Calibration of indicator dilution curves by dynamic method in man (Shinebourne *et al.*). 920
Canal, atrioventricular, common, banding of the pulmonary artery for (Somerville *et al.*). 816
— — — surgical treatment (Bourakovski *et al.*). 96
Cardiogram, normal, in pulmonary area (Berry & Mago). 405
Cardiologists, surgeon cardiologists of the 19th century (Evan Bedford). 461
Cardiology, Fifth World Congress, New Delhi, November 30, 1966. 636
Cardiomyopathy, hypertrophic obstructive, relation to subvalvar mitral incompetence (Oakley *et al.*). 629, *P.*
— — — auscultatory features, 90 cases (Tucker *et al.*). 629, *P.*
— Jamaican (Hill *et al.*). 594
— and pregnancy (Brown *et al.*). 387
Catheter, balloon, and creation of atrial septal defects in babies with transposition of the great vessels (Watson). 634, *P.*
— platinum electrode, diagnostic applications (Rotem & Miller). 232
Catheterization, cardiac, tamponade following, in constrictive pericarditis: case report (Jackson). 282
— of left atrium by Ross needle and Seldinger wire techniques (Verel). 380
— left heart, by direct ventricular puncture (McGuinness *et al.*). 633, *P.*
Cholera, Asiatic, electrocardiogram in, separated studies of effects of hypovolæmia, acidosis, and potassium loss (Carpenter *et al.*). 103
Circulation, extracorporeal, hæmodynamic and biochemical responses (Bain *et al.*). 634, *P.*
Circulatory response, systemic, to stress of simulated flight and to physical exercise before and after propranolol blockade (Eliasch *et al.*). 671
Coarctation, relation of plasma renin to blood pressure in patient with: case report (Pickens). 135
Compression, external, by a pericardial band, pulmonary stenosis caused by: case report (Barros & Gómez). 947
— internal cardiac, cardiac output during, dogs (McFarland & Binnion). 942, *P.*
Computers in cardiovascular investigation (Taylor *et al.*). 352
Conducting system of the heart, surgical pathology (Hudson). 646
Conduction, retrograde, in complete heart block (Castillo & Samet). 553
Congress of Cardiology, Fifth World, New Delhi, November 30, 1966. 636
Conversion, direct current, of atrial fibrillation, critical study (Scott & Patterson). 939, *P.*
Coronary artery disease, central venous pressure and cardiac output during exercise in (Follath). 714
— embolism, five cases (Cordeiro *et al.*). 91
— heart disease, hæmodynamic effects of alcohol in (Conway & Sowton). 941, *P.*
Crotalaria spectabilis seeds, ingestion, producing pulmonary hypertension, observations of lung mast cells and serotonin in (Heath *et al.*). 941, *P.*
Curve, indicator dilution, calibration by dynamic method, man (Shinebourne *et al.*). 920

Defect, atrial, septal, cardiac arrhythmias following successful surgical closure (Reid & Stevenson). 742
— — — creation by balloon catheter in babies with transposition of great vessels, (Watson). 634, *P.*
— — — left parasternal impulse in (Nagle & Tamara). 735
— — — operative treatment: clinical and hæmodynamic assessment in 175 patients (Cohn *et al.*). 725
— — — peripheral pulmonary artery murmur (Perloff *et al.*). 411
— — — secundum, and ventricular, phonocardiographic analysis of diastolic flow murmurs (Nadas & Ellison). 684
— atrioventricular, left ventricular angiocardiography in (Somerville & Jefferson). 939, *P.*
— septal ventricular, with aortic incompetence, hæmodynamics and prognosis (Hallidie-Smith *et al.*). 634, *P.*
— — — acquired, successful early repair after myocardial infarction: case report (Honey *et al.*). 453
— — — management (Hollman). 813
— — — pulmonary artery banding for (Grainger *et al.*). 289
— — — with pulmonary vascular disease, long term results of closure (Hallidie-Smith *et al.*). 939, *P.*
— — — and secundum atrial, phonocardiographic analysis of diastolic flow murmurs (Nadas & Ellison). 684
Defibrillation, D.C., blood quinidine measurements in management (Stentiford *et al.*). 632, *P.*
Diet, and acute myocardial infarction, in India (Malhotra). 337
Dilatation, poststenotic, reversibility, in femoral arteries of dogs (Roach). 630, *P.*
Diuresis, frusemide, augmentation by morphine in high altitude pulmonary œdema (Singh *et al.*). 709
Ductus arteriosus, patent, combined with congenital aorto-pulmonary fistula (Coleman *et al.*). 571
Dysrhythmias, cardiac, complications in 220 patients treated by phased direct current shock, and indications for electro-conversion (Resnekov & McDonald). 926

Eating habits, and acute myocardial infarction, in India (Malhotra). 337
Editorials: Ballistocardiography (Deuchar). 285: Surgeon cardiologists of the 19th century (Evan Bedford). 461: Surgery of the mitral valve (Turner). 641: Ventricular septal defect (Hollman). 813
Electrocardiogram in Asiatic cholera, separated studies of effects of hypovolæmia, acidosis and potassium loss (Carpenter *et al.*). 103
— in chronic lung disease (Millard). 43
— day-to-day variability in (Michaels & Cadoret). 913
— eight-hour: technique and clinical application (Aranaga *et al.*). 345
— return to normal after myocardial infarction (Burns-Cox). 627, *P.*
— right oblique transthoracic (Redfors *et al.*). 439
— in selective coronary arteriography (Coskey & Magidson). 512
— præcordial, lead system designed to record proximity effects on (Gamboa). 51

Electrocardiogram use in selection of patients for banding of pulmonary artery (Higashino & Moss). 252
Electrocardiography, compared with radiocardiography in exercise tolerance test (Sandler). 719
Electrodes, multipoint, application to telemetry in patient-monitoring and during physical exercise (Lewes & Hill). 689
Embolism, coronary, five cases (Cordeiro *et al.*). 91
Exercise, in coronary artery disease, central venous pressure and cardiac output during (Follath). 714
— hæmodynamic changes during (Sowton & Burkart). 770
— tolerance test, comparison of radiocardiography and conventional electrocardiography in (Sandler). 719

Fibrillation, atrial, conversion by propranolol (Wolfson *et al.*). 305
— — and flutter, hæmodynamic studies before and after electrical conversion of, to sinus rhythm (Resnekov). 700
— — value of direct current conversion, critical study (Scott & Patterson). 939, *P.*
Fibrosis, endomyocardial, and filariasis (Brockington *et al.*). 629, *P.*
Fistula, aorto-left: case report (Siang *et al.*). 807
— aorto-pulmonary, congenital, combined with patent ductus arteriosus, diagnosis and therapy (Coleman *et al.*). 571
— coronary arteriovenous, treated surgically: case report (Abrams *et al.*). 132
Flow, blood, collateral, in experimental myocardial infarction. Early changes by a new method using Xenon^{133} clearance (Rees *et al.*). 940, *P.*
— — inhomogeneity detected by washout of inert gases (Green *et al.*). 940, *P.*
Flutter, atrial, conversion by propranolol (Wolfson *et al.*). 305
— — and fibrillation, hæmodynamic studies before and after electrical conversion to sinus rhythm (Resnekov). 700
— — left atrial impulse formation in (Mirowski & Alkan). 299
Free fatty acids, serum, after acute myocardial infarction (Kurien *et al.*). 628, *P.*
Frusemide diuresis, augmentation by morphine in high altitude, pulmonary œdema (Singh *et al.*). 709
Fungal infection, fatal, following open-heart surgery: case report (Newsom *et al.*). 457

Geriatrics, myocardial infarction in 387 patients (Pathy). 190
Glucose, potassium, and insulin in treatment of myocardial infarction (Mittra). 616
γ-Glutamyl-transpeptidase, serum, in myocardial ischæmia (Hedworth-Whitty *et al.*). 432
Gradient(s), reversed mitral diastolic, in aortic regurgitation (Oliver *et al*). 239
— right ventricular systolic pressure, in aortic valve disease (Epstein *et al.*). 490

Hæmolysis, chronic, following cardiac surgery (Bell *et al.*). 327
Heart, biopsies, in electron microscopic observations of alcoholic heart disease (Alexander). 200
— disease congenital, with arrhythmia in one family (Amarasingham & Fleming). 78
— — — incidence in Nigerian children (Gupta & Antia). 906
— — — with severe pulmonary hypertension, radio-iodine in treatment (Varnauskas *et al.*). 838
— — hypertensive, and ischæmic, effect of propranolol on left atrial systole in (Fleming & Hamer). 257
— — ischæmic, comparison of radiocardiography and conventional electrocardiography in (Sandler). 719
— — — delayed closure of the aortic valve in (Agnew *et al.*). 775
— — — epidemiology, India, special reference to causation (Malhotra). 895
— — — and hypertensive, effect of propranolol on left atrial systole in (Fleming & Hamer). 257
— failure, with brain damage in the newborn (Gray & Prosser). 30
— pressures, right, in acute myocardial infarction (Fluck *et al.*). 748
— rate, increase, in response to stimulation of receptors in the left atrium (Linden *et al.*). 631, *P.*
— surgery, open, for mitral disease (Bath *et al.*). 938, *P.*
— tumour, unusual secondary: case report (Rogen & Moffat). 638, *P.*
Heroin, intravenous, circulatory effects in acute myocardial infarction (Macdonald *et al.*). 940, *P.*
Hodgson, J., surgeon cardiologist of the 19th century (Evan Bedford). 463
Hyperkinetic index, lung function studies in left-to-right shunts (Davies & Gazetopoulos). 317
Hypertension, pulmonary, produced by ingestion of *Crotolaria spectabilis* seeds, lung mast cells and serotonin in (Heath *et al.*). 941, *P.*
— — severe, in congenital heart disease, radio-iodine in treatment (Varnauskas *et al.*). 838
— systemic, in mitral valve disease (Fenton & Mulholland). 938, *P.*
Hypovolæmia, and electrocardiogram in Asiatic cholera (Carpenter *et al.*). 103

Impulse, left atrial formation in atrial flutter (Mirowski & Alkan). 299
— — parasternal in atrial septal defect (Nagle & Tamara). 735
Incompetence, *see* Regurgitation.
India, epidemiology of ischæmic heart disease in, with special reference to causation (Malhotra). 895
Infarction, cardiac, changes in cardiac output and stroke volume during first four months after (Nager *et al.*). 859
— — acute, natural history and clinical significance of arrhythmias after (Fluck *et al.*). 170
— myocardial, acute, cardiac arrhythmias in, and metabolic acidosis, relationship (Anderson *et al.*). 939, *P.*
— — — Cheyne-Stokes respiration following, cardio-pulmonary studies (Fluck *et al.*). 631, *P.*
— — — circulatory effects of intravenous heroin in (Macdonald *et al.*). 940, *P.*
— — — complicated by mitral regurgitation (Heikkilä). 162
— — —free adrenaline and noradrenaline excretion in (Valori). 628, *P.*
— — — geographical aspects in India with special reference to patterns of diet and eating (Malhotra). 337
— — — influence of propranolol on mortality and complications (Jewitt *et al.*). 628, *P.*
— — — right heart pressures in (Fluck *et al.*). 748
— — — serum free fatty acids after (Kurien *et al.*). 628, *P.*
— — complicated by perforation of peptic ulcer (Cassell & Nicholson). 129
— — in the elderly (Pathy). 190
— — experimental, beta-adrenergic blockade in (Pentecost & Austen). 628, *P.*
— — — collateral blood flow, early changes by a new method using xenon^{133} clearance (Rees *et al.*). 940, *P.*
— — and intrinsic calibre of coronary arteries (Rose *et al.*). 548

Infarction, myocardial, potassium, glucose, and insulin in treatment (Mittra). 616
— — pulmonary function in (Kirby *et al.*). 940, *P.*
— — return of electrocardiogram to normal after (Burns-Cox). 627, *P.*
— — successful early repair of acquired ventricular septal defect after: case report (Honey *et al.*). 453
Infection, associated with shock, hæmodynamic studies (Loeb *et al.*). 883
Insufficiency, aortic, and atrial transport (Herbert). 559
Insulin, potassium, and glucose in treatment of myocardial infarction (Mittra). 616
Interval, Q–1 or C–1, in diagnosis of mitral stenosis (Oreshkov). 778
Ischæmia, myocardial, serum γ-glutamyl transpeptidase in (Hedworth-Whitty *et al.*). 432
— *see also* Heart disease, ischæmic

Jamaican cardiomyopathy (Hill *et al.*). 594

Leads, system designed to record proximity effects on the præcordial electrocardiagram (Gamboa). 51
Liver, symmetrical, absent inferior vena cava, splenic agenesis, situs inversus and their embryology (Campbell & Deuchar). 268
Lung disease, chronic, electrocardiogram in (Millard). 43
— function studies in patients with left-to-right shunts (Davies & Gazetopoulos). 317

Mast cells, and serotonin, in rats with pulmonary hypertension produced by ingestion of *Crotalaria spectabilis* seeds (Heath *et al.*). 941, *P.*
Mitral incompetence. *see* Regurgitation, mitral.
— stenosis, *see* Stenosis, mitral.
Monitoring, patient, application of multipoint electrodes to telemetry in, and during physical exercise (Lewes & Hill). 689
Morphine, augmentation of frusemide diuresis by, in high altitude pulmonary œdema (Singh *et al.*). 709
Murmur(s), diastolic flow, phonocardiographic analysis in secundum atrial septal defect and ventricular septal defect (Nadas & Ellison). 684
— peripheral pulmonary artery, of atrial septal defect (Perloff *et al.*). 411
Myocardium, left ventricular, flowmeter studies of internal mammary artery function after implantation into (Provan). 631, *P.*
— oxygen extraction rate, at rest and on exercise in various conditions (Binak *et al.*). 422

Needle, Ross, and Seldinger wire techniques in catheterization of the left atrium (Verel). 380
— transseptal, improved design for (Rainbow *et al.*). 394
Newborn, heart failure with brain damage in (Gray & Prosser). 30
Nigerian children, incidence of congenital heart disease (Gupta & Antia). 906
Node, sinus, arterial blood supply, man (Verhaeghe & van der Hauwaert). 801
Noradrenaline, and adrenaline, free, excretion in acute myocardial infarction (Valori). 628, *P.*

Œdema, pulmonary, high altitude, augmentation of frusemide diuresis by morphine (Singh *et al.*). 709
Osteoclastoma, of the heart (Dorney). 276
Oxygen extraction rate of the myocardium at rest and on exercise in various conditions (Binak *et al.*). 422

Pacemaker(s), artificial, used in patients with chronic heart block, cause of death (Harris *et al.*). 633, *P.*
— and iatrogenic escape-capture bigeminy (Castellanos *et al.*). 264
— "heart sound" (Harris). 608, 630, *P.*
— implanted, detection of impending failure (Sowton). 632, *P.*
— implantation in familial congenital A-V block complicated by Adams-Stokes attacks: case report (Veracochea *et al.*). 810
— time relation between two, in atrial parasystole (Moulopoulos & Sideris). 758
Pacing, atrial, during selective coronary angiography (Benchimol & McNally). 767
Parasystole, atrial, time relation between two pacemakers in (Moulopoulos & Sideris). 758
Pericarditis, constrictive, cardiac tamponade in following cardiac catheterization: case report (Jackson). 282
Peru, sea-level and high altitude, histology, extensibility and chemical composition of pulmonary trunk (Castillo *et al.*). 120
Phæochromocytoma, cardiac complications (Northfield). 588
Phonocardiogram(s) of the ball-and-cage aortic valve prosthesis (Dayem & Raftery). 446
— intracardiac, experience with a septal puncture technique which allows recording from the left side of the heart (Mendel). 634, *P.*
Phonocardiographic formula, simple, for predicting left atrial pressure in mitral stenosis (Davies). 843
Posture, effect on cardiac output during last six weeks of pregnancy (Boyle *et al.*). 941, *P.*
Potassium, glucose, and insulin in treatment of myocardial infarction (Mittra). 616
— loss, and electrocardiogram in Asiatic cholera (Carpenter *et al.*). 103
Præcordial movement, quantitation in normal subjects and in patients with mitral regurgitation (Sutton & Craige). 629, *P.*
Pre-excitation, ventricular, type B, intracavitary potentials (Watson & Lowe). 505
Pregnancy and cardiomyopathy (Brown *et al.*). 387
— effect of posture on cardiac output during last six weeks (Boyle *et al.*). 941, *P.*
— congenital complete heart block in (Kenmure & Cameron). 910
Propranolol, blockade, systemic circulatory response to stress of simulated flight and to physical exercise before and after (Eliasch *et al.*). 671
— conversion of atrial fibrillation and flutter by (Wolfson *et al.*). 305
— dextro isomer (+), effects on sinus rate and cardiac arrhythmias (Howitt *et al.*). 942, *P.*
— effect on left atrial systole in ischæmic and hypertensive heart disease (Fleming & Hamer). 257
— effect of left ventricular work in aortic stenosis (Hamer & Fleming). 871, 942, *P.*
— influence on mortality and complications of acute myocardial infarction (Jewitt *et al.*). 628, *P.*
— in management of muscular subaortic stenosis (Sloman). 783
— modification of cardiovascular responses by (Vogel & Blount). 310
Pulmonary function in myocardial infarction (Kirby & McNicol). 940, *P.*

Quinidine, blood, measurements in the management of D.C. defibrillation (Stentiford *et al.*). 632, *P.*

Radiocardiography, comparison with conventional electrocardiography in exercise tolerance test (Sandler). 719

Radio-iodine in treatment of congenital heart disease with severe pulmonary hypertension (Varnauskas *et al.*). 838
Receptors, left atrial, stimulation, and increase in heart rate (Linden *et al.*). 631, *P.*
Regurgitation, aortic, reversed mitral diastolic gradient in (Oliver *et al.*). 239
— mitral, complicating acute myocardial infarction (Heikkilä). 162
— — quantitation of præcordial movement, normal subjects and patients (Sutton & Craige). 629, *P.*
— — subvalvar, relation of hypertrophic obstructive cardiomyopathy to (Oakley *et al.*). 629, *P.*
— — surgical treatment (Logan *et al.*). 1
Renin, plasma, relation to blood pressure in patient with coarctation: case report (Pickens). 135
Respiration, Cheyne-Stokes, following myocardial infarction, cardio-pulmonary studies (Fluck *et al.*). 631, *P.*
Responses, cardiovascular, modification by propranolol (Vogel & Blount). 310
Ross needle and Seldinger wire techniques in catheterization of left atrium (Verel). 380

Sea-level, in Peru, histology, extensibility, and chemical composition of pulmonary trunk in persons living at sea-level and high altitude (Castillo *et al.*). 120
Seldinger wire and Ross needle techniques in catheterization of the left atrium (Verel). 380
Septum, atrial, puncture technique, allowing the recording of intracardiac phonocardiograms from the left side of the heart (Mendel). 634, *P.*
— ventricular, membranous, aneurysm of (Jain & Rosenthal). 60
— *see also* Defects.
Serotonin, and lung mast cells, in rats with pulmonary hypertension produced by ingestion of *Crotalaria spectabilis* seeds (Heath *et al.*). 941, *P.*
Shock, associated with infection, hæmodynamic studies (Loeb *et al.*). 883
— direct current, phased, complication in 220 patients with cardiac dysrhythmias treated by, indications for electroconversion (Resnekov & McDonald). 926
Shunts, left-to-right, diagnosis, comparison of blood oximetry and ascorbate dilution technique (Bentivoglio *et al.*). 212
— — — — lung function studies in (Davies & Gazetopoulos). 317
— right-to-left, clinical use of ascorbic acid as indicator (Levy *et al.*). 22
Sinus rate, effects of the dextro isomer (+) of propranolol on (Howitt *et al.*). 942, *P.*
Situs inversus, and absent inferior vena cava, symmetrical liver, splenic agenesis, and their embryology (Campbell & Deuchar). 268
Sound, "heart", pacemaker (Harris). 608, 630, *P.*
Spleen, agenesis, absent inferior vena cava, symmetrical liver, and situs inversus and their embryology (Campbell & Deuchar). 268
Stenosis, aortic, congenital, assessment of site and severity (Oakley & Hallidie-Smith). 367
— — — natural history (Campbell). 635, *P.*
— — effect of propranolol on left ventricular work in (Hamer & Fleming). 871, 942, *P.*
— — left ventricular volume in, a thermodilution and a radiographic method (Fleming & Hamer). 630, *P.*
— — prediction of left ventricular diastolic pressures in, from the apex cardiogram. (Fleming & Hamer). 942, *P.*
— — valve, assessment by left ventricular puncture and left atrial catheterization (Verel & Taylor). 633, *P.*
— — — early systolic sounds in (Donnelly & Vandenberg). 246
— mitral, congenital, review of eight children (Singh *et al.*). 83
— — movement of mitral valve cusps in relation to first heart sound and opening snap in (McCall & Price). 417
— — a simple phonocardiographic formula for predicting left atrial pressure in (Davies). 843
— — Q–1 or C–1 interval in diagnosis (Oreshkov). 778
— pulmonary, and double outlet right ventricle (Dayem *et al.*). 64: (Shelty & Martin). 279
— — due to external compression by a pericardial band: case report (Barros & Gómez). 947
— — left parasternal impulse in (Nagle & Tamara). 735
— subaortic, muscular, propranolol in management (Sloman). 783
— supravalvar, of the pulmonary artery (Schlesinger & Meester). 829
Surgery, cardiac, chronic hæmolysis following (Bell *et al.*). 327
— open-heart, fatal fungal infection following: case report (Newsom *et al.*). 457
Systole, left atrial, effect of propranolol on, in ischæmia and hypertensive heart disease (Fleming & Hamer). 257
Systolic sounds, early, in aortic valve stenosis (Donnelly & Vandenberg). 246

Tamponade, cardiac, in constrictive pericarditis following cardiac catheterization: case report. (Jackson). 282
Telemetry, application of multipoint electrodes to, in-patient-monitoring and during patient exercise (Lewes & Hill). 689
Tetralogy of Fallot, and aplasia of the right pulmonary artery (Porstmann *et al.*). 531
— — — ventricular structure and function after radical correction (Hallidie-Smith *et al.*). 533
Thrombosis of main pulmonary arteries, two cases (Reuben). 621
Transposition, complete, great vessels, acid-base balance (Shaher & Kidd). 207
— great arteries, anatomically corrected (Van Praagh, R. & Van Praagh, S.). 112
— great vessels, creation of atrial septal defects by balloon catheter in babies with (Watson). 634, *P.*
Trunk, pulmonary, histology, extensibility, and chemical composition, in persons living at sea-level and at high altitude in Peru (Castillo *et al.*). 120
"Tumours", papillary, of the left ventricle (Heath & Thompson). 950

Ulcer, peptic, perforation complicating myocardial infarction (Cassell & Nicholson). 129
Ultrasound, reflected, as a diagnostic instrument in mitral valve disease (Winters *et al.*). 788

Valve(s), aortic, ball-and-cage prosthesis, phonocardiogram (Dayem & Raftery). 446
— — delayed closure in ischæmic heart disease (Agnew *et al.*). 775
— — disease, right ventricular pressure gradients (Epstein *et al.*). 490
— — left ventricular function immediately after homograft replacement of (Fordham & Resnekov). 630, *P.*
— — *see also* Stenosis.
— heart, ageing changes (Pomerance). 222
— mitral, calcification, results of 100 valvotomies (Kitchin & Turner). 137
— — cusps, movement in relation to first heart sound and opening snap in patients with mitral stenosis (McCall & Price). 417

Valve(s), disease, reflected ultrasound as a diagnostic instrument in study (Winters *et al.*). 788
— — surgery (Turner). 641
— tricuspid, duplication: case report (Cascos *et al.*). 943
Valvular disease, mitral, open heart surgery for (Bath *et al.*). 938, *P.*
— — mitral, systemic hypertension in (Fenton & Mulholland). 938, *P.*
Vectorcardiogram, Frank lead system, normal infants and children (Khoury & Fowler). 563
Vena cava, inferior, absent, and symmetrical liver, splenic agenesis, situs inversus, and their embryology (Campbell & Deuchar). 268
Ventricle, double outlet right, with pulmonary stenosis: case report (Shetty & Martin). 279
— left, ejection, ballistocardiogram showing, dog (Deuchar *et al.*). 631, *P.*
Ventricle, left, function immediately after homograft replacement of aortic valve (Fordham & Resnekov). 630, *P.*
— — left heart catheterization through direct puncture (McGuinness *et al.*). 633, *P.*
— — papillary "tumours" of (Heath & Thompson). 950
— right, double outlet, with pulmonary stenosis (Dayem *et al.*). 64: (Shetty & Martin). 279
Vessels, great, complete transposition, acid-base balance (Shaher & Kidd). 207
Volume, blood, pulmonary, determination by injection into pulmonary artery and sampling in left atrium (Nakhjavan *et al.*). 602
— ventricular, left, in aortic stenosis by a thermodilution and a radiographic method (Fleming). 630, *P.*

Wardrop, J. surgeon cardiologist of the 19th century (Evan Bedford). 465
